## TECHNOLOGY STACK

### Main Development

- Python
- JavaScript
- React
- HTML/CSS
- Tailwind

### AI & Automation

- OpenAI API
- n8n
- GPT Integration
- Make
- AI Agents / MCP

### CMS & Platforms

- WordPress
- Shopify
- WooCommerce
- Elementor

### Tools, Design and Version Control

- Git & GitHub
- FireBase
- Figma (UX/UI)
- Vercel

## TECHNICAL SKILLS

- AI Process Automation
- Conversational Agent Design
- Systems and API Integration
- Front-End Development
- E-commerce Solutions Development
- User Experience Design

## LANGUAGES

- Spanish
- Nativo
- English
- B2
- Portuguese
- A2

# James Messino

## Multimedia Engineer

Multimedia Engineer from Universidad Simón Bolívar, with additional studies in Programming and a Minor in Digital Marketing. I specialize in designing and implementing innovative technological solutions, including the creation of AI agents and complex automations using tools such as n8n and Python. By combining my expertise in front-end development and AI architecture, I build efficient systems that address business challenges and optimize operational processes.

## Experience

### Co-Founder & Technology Lead

#### Zenthos Digital

2025- Present

- Co-Founder of the agency, responsible for defining the technology strategy with a focus on custom web development, automation, and AI solutions.
- Architecture and implementation of intelligent agents using Model Context Protocol (MCP).
- Technical Project Management for clients, including consulting and development of e-commerce platforms (Shopify) and providing technical support for digital marketing campaigns.
- Lead Architect and Principal Developer of the company's digital ecosystem, overseeing the design and implementation of a corporate WordPress site with custom-built plugins that demonstrate our technical expertise.
- Designed end-to-end automation solutions for clients, overseeing the entire process from requirements analysis to the implementation of intelligent workflows (n8n) and AI-driven chatbots to optimize business operations.

### Highlighted Technical Projects

#### Independent Development

2021- Present

- Autonomous Personal Assistant (MCP & WhatsApp API): Developed an AI-powered agent through the WhatsApp API (audio/text) to automate and manage Gmail, Notion, and Calendar, leveraging Model Context Protocol (MCP) and n8n.
- Native AI Chatbot Plugin for WordPress: Created a native plugin (no external widgets) with an advanced conversational engine powered by the Gemini API and integrated automation workflows using n8n.
- AI Business Chatbots for WhatsApp: Implemented conversational AI chatbots to deliver humanized interactions, streamlining operations including restaurant order management (database-connected) and automated scheduling of medical appointments.
- 2D Video Game Programming (Unity): Served as lead programmer on a Unity (C#) project, specializing in the implementation of core gameplay mechanics, interactive features, and AI systems for NPCs.

## Academic Background

### Multimedia Engineer

#### Universidad Simón Bolívar, Colombia

2019- 2024

- Comprehensive training in digital systems, programming, and multimedia technologies
- Minor in Digital Marketing: growth strategies and digital analytics

### Additional Studies in Programming

#### Universidad del Norte, Colombia

2020- 2021

- In-depth study of data structures, algorithms, and software development
- Advanced training in development methodologies and application architectures

"The difference between ordinary and extraordinary lies in execution."
